

## Commercial Pools

Aquamats provide a comprehensive range of rollers and covers for commercial, semi-commercial, public, schools, leisure centres and hotel swimming pools.

We manufacture our own rollers in our Yorkshire depot therefore we can make rollers to suit any size pool.

With a range of manual or motorised options manufactured from the highest specification materials, our roller systems compliment our choice of covers to allow ease of operation and the top levels of heat retention.

Aquamats offer a professional and quality service and provide if required, first class installation of your reel and cover.

We are happy to visit your site and give the necessary advice and a detailed quotation.

12.50m x 25.00m*

*Pool in the Midlands 7.28m x 18.26m  
with High Level Roller*

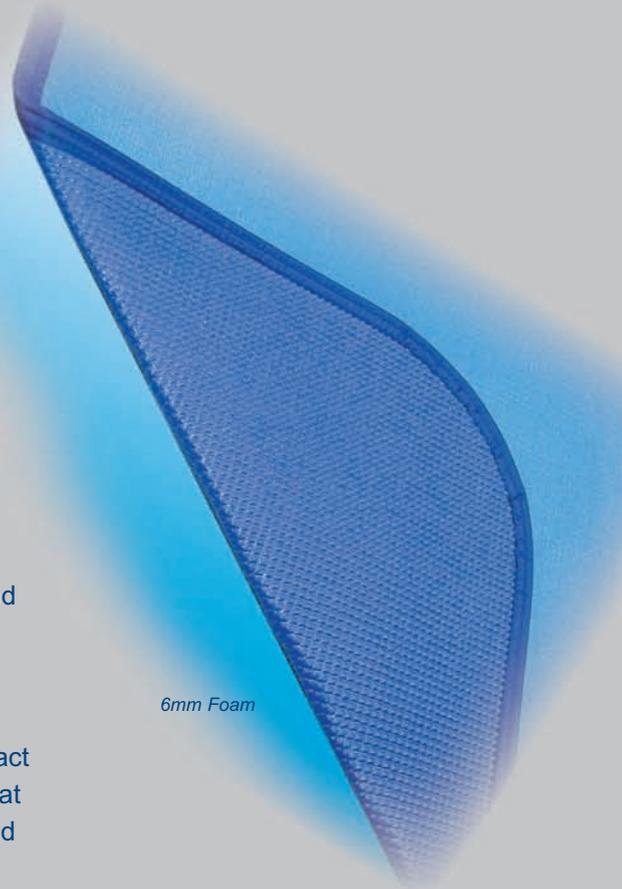

Commercial pool heat retention covers reduce heating bills, chemical usage and dehumidification costs. Return on investment can be as little as 12 months. Aquamat offer a high quality 6mm Foam cover as well as a SB550 Reinforced Bubble cover.

Aquamat 6mm Foam covers are made from heavy duty closed cell polyethylene foam (460gm<sup>2</sup>) which makes them particularly suitable for use on school and commercial pools. The covers are supplied heat welded on the top and bottom on all seams and can be finished with a tough PVC hem at an additional cost.

Aquamat SB550 Reinforced cover is a conventional 400 micron blue cover with a tough 172gsm tarpaulin type fabric laminated to the topside. This is particularly suitable for use where the cover is likely to be handled frequently. Its strength and heat retention properties make it ideal for use on indoor pools.

All products are guaranteed for 12 months from date of purchase against defective workmanship and materials, and maintenance contracts are available.

For more details, prices or to arrange a site survey please contact us on **01453 884411** or e-mail us at **[sales@aquamatcovers.co.uk](mailto:sales@aquamatcovers.co.uk)** and our professional enthusiastic staff will be happy to help you.
